

Blueberry — Quick Guide

Best Method

- Semi-ripe or hardwood cuttings

Root Time

- 8-12 weeks

Potting-On

- Pot up when firm rooting is established.

Propagation Tips

- Use acidic ericaceous compost with added perlite.
- Keep evenly moist — never let dry out.
- Cool sheltered spot improves success rate.
- Layering also works for established plants.

Label Format

- Example: “Blueberry — Semi-ripe or hardwood cuttings — 12-Oct”
