

# Chives — Quick Guide

## Best Method

- Division

## Root Time

- 2-3 weeks

## Potting-On

- Pot when new shoots emerge.

## Propagation Tips

- Lift clumps and split into small sections with roots and shoots.
- Trim top growth by one third.
- Best divided spring to early autumn but tolerates mild autumn if sheltered.

## Label Format

- Example: “Chives — Division — 12-Oct”
