

# Grapevine — Quick Guide

## Best Method

- Hardwood cuttings

## Root Time

- 6-10 weeks

## Potting-On

- Pot in late winter when callused and buds swell.

## Propagation Tips

- Take 30 cm cuttings with at least three nodes.
- Lay flat in sand/compost bed or insert vertically with top node exposed.
- Keep cool but frost-free.

## Label Format

- Example: "Grapevine — Hardwood cuttings — 12-Oct"
